Index

1. Installation 3
2. Installation (Custom Theme) 6
3. Configuration 7
4. Quick Notes 13
5. Technical Support 14

1. Installation

Step 1

Check Permissions

Make sure the ''app'' and ''skin'' directories of your Magento and all directories inside it have full written permissions or set permissions on the each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permission at
http://www.magentocommerce.com/wiki/magento_filesystem_permissions

Step 2

Disable Compilation

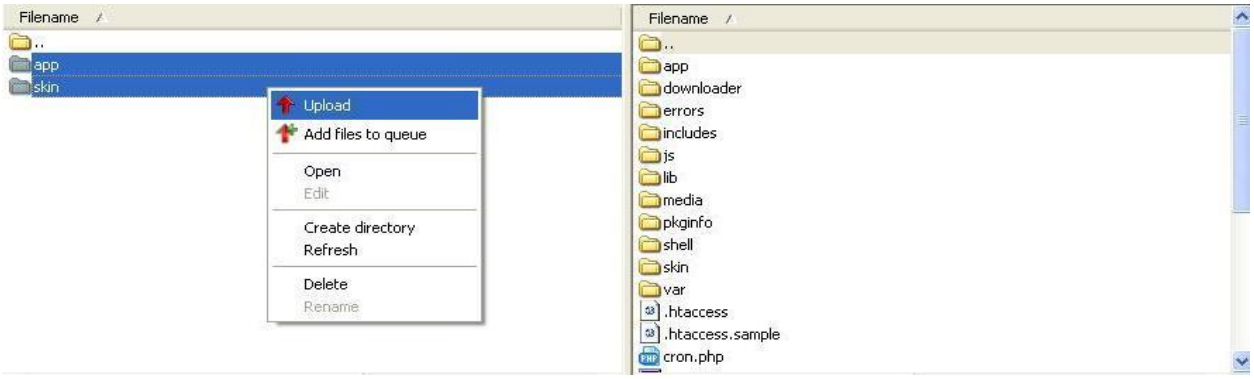
Log into Magento **Admin Panel** and go to **System → Tools → Compilation** and disable the compilation.

After **step 5** you can run the compilation process again.

Step 3

Upload Files

Upload all folders from the extension package to the installation directory of your Magento software using an FTP client.



Step 4

Clear cache

Go to **System** → **Cache Management**.

Clear the store cache.

Step 5

Re-login

Log out and log back into **Magento Admin Panel.**

Step 6

Use Extension

Go to **System** → **Configuration**.

In the left column you will see the new tab – **Biztech Extensions.**
